# USER MANUAL

It is quite easy to use this database by the Organ Donation Organisation.

For this Organisation admin has to enter the User-id and Password which is set in the database.

Then the home page of the website is opened where the admin can alter the user data such as add, update, delete etc.

In the user option, admin can search, update and delete the user by entering user id.

In the search option, admin can search the user, patient details, doctor details, medical institutions by entering the details.

In the add option, admin can add the new user details.

In the update option, admin can update any information in the database.

In the remove option, admin can remove any information from the database.

In the statistics option admin can view the number of patients with each disease and the number of successful operations carried out.
